Website	https://ultimaproducts.hk
Date of KID	24.04.2025

You are about to purchase a product that is not simple and may be difficult to understand.

What is the Product?

Type

English law governed over-the-counter (OTC) equity derivative transaction linked to the worst performing share among those set out below with ‘memory coupon’ features. Forms of contract documentation governing this type of transactions can be found at: https://ultimaproducts.hk. You may invest not less than USD 10000.0 in the product.

Under the applicable laws and regulations of the relevant jurisdictions, including Hong Kong, the Republic of Cyprus or the DIFC, it may be required for you to enter into OTC derivative transactions with The Ultima Products HK Limited through a duly authorized and regulated investment firms (including The Ultima World (DIFC) Limited) acting as agent for and on your behalf (intermediary). The Ultima Products HK Limited does not guarantee that any intermediary will agree to act for and on your behalf in entering into any such transactions. You are hereby notified that the product issuer and its counterparties belong to the same financial group.

Objective

The product is designed to provide a return in the form of (1) unconditional coupon payments and (2) a cash payment depending on the realization of the credit risk of the **reference entities** (as defined below). The timing and amount of these payments will depend on the performance of the underlying shares. The product has a fixed term and will terminate on the **maturity date** (as defined below), unless terminated early. If, at redemption valuation date or earlier, you receive the credit event notice regarding at least 1 of the reference entities, you will receive the part of notional based on the price of the reference bond and, consequently, **LOSE UP TO YOUR ENTIRE INVESTMENT**.

Coupon. If on any **event determination date** (as defined below) the worst performing share’s current price *is at or above* Coupon Barrier Price N of its initial price you will, within two (2) business days following that event determination date, receive a **coupon** equal to coupon rate N on the amount of your investment calculated for the period starting from the immediately preceding event determination date or, in respect of the first coupon, **valuation date** (as defined below) plus any unpaid coupons at Coupon Rate N for the previous period(s) multiplied by Snowball Coefficient (if no coupon rates were paid on the previous periods).**Early termination following Credit Event Notice.** If a Credit Event Notice is served to you on or prior to a Scheduled Termination Date, within five (5) Business Days, you will receive the cash payment based on the price of the **Reference Obligation** (as defined below), of the Affected Reference Entity and the product will be terminated. This payment is calculated as the product of: (i) the Notional; (ii) the minimum between 1 and the ratio of the Exchange Rate of the Trade Date and Exchange Rate of the date of the Credit Event Notice; (iii) the Performance Ratio of the Reference Obligation of the Affected Reference Entity; (iv) the Fallback Coefficient.

Termination on the maturity date. If the product has not terminated early, within five (5) Business Days following the Maturity Date, you will receive the Notional.

Potential adjustment events. If during the lifetime of the product a split, consolidation or any other event having a diluting or concentrative effect on the theoretical value of the relevant underlying share occurs the terms of the product may be correspondingly adjusted and you will be duly notified of such adjustment.

Extraordinary events. If during the term of the product any extraordinary event (such as nationalization, insolvency or delisting) occurs in respect of an issuer of any underlying share, such share’s current price in respect of any date for the purposes of the product shall be decreased by 30%. Consequently, due to an extraordinary event you may **LOSE UP TO YOUR ENTIRE INVESTMENT**.

Event Determination Dates	Coupon Barrier 1	Coupon Barrier 2	Coupon Rate 1	Coupon Rate 2
03.02.2026	0.0	1.4	0.053507	0.057329
03.02.2027	0.0	1.4	0.07	0.075
03.02.2028	0.0	1.4	0.07	0.075
03.02.2029	0.0	1.4	0.070192	0.075205
03.02.2030	0.0	1.4	0.07	0.075

Reference entities

Reference Entity	Issuer	ISIN	Par Value
Treasury Bill 051525	UNITED STATES DEPARTMENT OF THE TREASURY	US912797LB15	100

Underlying shares

Ticker	Issuer	ISIN	Currency
MA	Mastercard	US57636Q1040	US Dollar
V	Visa Inc.	US92826C8394	

Minimum scenario	There is no minimum guaranteed return if you exit before recommended holding period. You could lose some or all of your investment.		
Stress scenario (product ends after 4.8 years)	What you might get back after costs:	USD 10625.00	USD 13337.00
	Average return each year:	6.25%	6.23%
Unfavourable scenario (product ends after 4.8 years)	What you might get back after costs:	USD 10740.00	USD 13337.00
	Average return each year:	7.40%	6.23%
Moderate scenario (product ends after 4.8 years)	What you might get back after costs:	USD 10806.00	USD 14110.00
	Average return each year:	8.06%	7.49%
Favourable scenario (product ends after 4.8 years)	What you might get back after costs:	USD 10821.00	USD 15512.00
	Average return each year:	8.21%	9.65%

This table shows the money you could get back over the next 57 months under different scenarios, assuming that you invest USD 10 000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. In addition, you should note that the results shown for the intermediate holding periods do not reflect estimates of the product’s future value. You should therefore not base your investment decision on the results shown for these interim holding periods. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. For more information, see “How long should I hold it and can I take money earlier?” below.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor [or distributor (intermediary)]. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if The Ultima Products HK Limited is unable to pay out?

You are exposed to the risk that The Ultima Products HK Limited might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not a deposit and as such is not covered by any deposit protection scheme.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest USD 10 000. The figures are estimates and may change in the future.

Cost over Time and Composition of Costs

Scenarios	If the product is called at the first possible date	If you cash in at the end of the recommended holding period
Total costs	USD 270.00	USD 270.00
Impact on return (RIY) per year	2.70 %	0.57 %

Composition of costs:

- The table below shows
- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
 - The meaning of the different cost categories.

One-off costs	Entry costs	2.00%	The impact of these costs is already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it terminates by your decision.
Ongoing costs	Maintainance cost: This is an estimate based on actual costs	0.70%	The impact of these costs is already included in the price.

The costs shown in the table above represent how much the expected costs of the product would affect your return, assuming the product performs in line with the moderate performance scenario. The total costs are composed of the **early termination cost** up to 35% of the amount you invest.

How long should I hold it and can I take money earlier?

Recommended holding period: 57 months

The product aims to provide you with the return described under “What is this product?” above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until the maturity date.

You, however, have an option to terminate the product early. In case you do so you will, within 5 (five) business days upon the proposed early termination date receive the **early termination amount** equal to 65% of the Notional multiplied by the lesser of (a) one; or (b) the ratio between the Worst Performing Share’s Current Price as of Early Termination Valuation Date and 100% of its initial value. The The Ultima Products HK Limited may at its own discretion increase the Early Termination Amount.

How can I complain?

Any complaint regarding the conduct of the person advising on, or distributing, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted by e-mail at info@ultimaproducts.hk; by post at: Suite 1201, 12/F., Chinachem Leighton Plaza, No. 29 Leighton Road, Causeway Bay, Hong Kong.
